BOUCHER

Human resource development is more successful developing country's investment. We have used the education as a tool for developing human resources in different ways. But those of the various factors that are important for developing that the human resource development is the most important thing. The people says that about this more in human resource development for sustainable development and ways to concern to use about technology for the development of education for the distributions of opportunity and equality in education this will be continued development of the country's overall successes.

Royal Highness Princess Maha Chakri Sirindhorn

๒ June ๑๙๙๕

The vocational education has many forms, in B.E ๒๕๕๑ the education has been issued a law on vocational education it is the Dual Vocation Training – DVT for supporting to the work-place and also the student can practice with the truth job.

The Dual Vocational Training – DVT education will be managing for the vocational education's objective between the student and workplace because of the student they can learning and doing in the same times, and after their graduation they can work with the workplace as well. So the Dual Vocational Training education is very appropriate with the current situation.
